

VENPIPE® FULL PROTECTION SUIT

The VenPIPE® system offers an unmatched level of wearer protection, comfort and operational efficiency. The air supply is completely integrated in the suit and the functional regulation valve – no further breathing device required: no carry-over of hazardous substances; no cleaning / decontamination of breathing device. Internal air channels inside the suit distribute air to whole body, providing cooling and comfortable working. Front entry with zipper, undressing ribbon next to the zipper, four covered exhalation valves in hood and on back, emergency rip cord.

Full protection suit details:

- made with DuPont™ Tychem® C , DuPont™ Tychem® F or DuPont™ Tyvek®*
- finger loops or gloves; anti-slipping and antistatic sole suitable for safety shoes
- highly transparent visor
- sizes S-XXL; range of options: incl. different types and sizes of gloves, antistatic feature, filter on exhalation valve, socks with boot overlap
